

Deliverable For:

**Gateway Cities Traffic Signal Synchronization
and Bus Speed Improvement Project**

I-5/Telegraph Road Corridor

Deliverable For Task 15

**List of Additional Streets
Final**

Submitted To:

**Los Angeles County
Department of Public Works**

Submitted By:

**Siemens Energy & Automation, Inc.
Gardner Transportation Systems Business Unit**

May 22, 2003

Introduction

Recently, the County reviewed the areas in the three Gateway Cities ITS Corridor Forum Projects (I-105, I-5/Telegraph Road and I-710/Atlantic Blvd.) and determined that an expanded geographic area would enable a true subregional approach to the intelligent transportation system deployment and will facilitate the installation of these improvements in a greater geographic area, thus providing a greater benefit to the residents of Los Angeles County. Figure 1 presents the preliminary project boundaries as revised by the County.

The original scope of work for the I-5/Telegraph Road included only one arterial – I-5/Telegraph Road. The following six cities were involved:

- City of Commerce
- City of Montebello
- City of Pico Rivera
- City of Downey
- City of Santa Fe Springs
- City of La Mirada

For I-5/Telegraph Road Project, the coverage area expansion not only added more east west and north south streets, but also resulted in inclusion of two more cities, Whittier and Norwalk.

Before finalizing the streets to be included in the project area, Siemens GTS met with the individual cities. The purpose of these meetings was to make the cities aware of the change in project area and to give them opportunities to review the expanded project area and provide any comments and or changes.

City of Downey requested that the boundary for Paramount Blvd. and Lakewood Blvd. be extended to Rosecrans Ave. (for I-5/Telegraph Road Corridor Project). The city explained that they were making this request because they would like all arterials within City of Downey to be included in one Forum Project.

City of Santa Fe Spring requested the following additional segments to be added in this project:

- Pioneer Blvd. between Slauson Ave. and Telegraph Road,
- Shoemaker Ave. between Los Nietos Rd. and Imperial Hwy.,
- Los Nietos Rd. between I-605 and Telegraph Rd.

These additional requests by the two cities are shown in Figure 2.

Siemens GTS staff then met with the County to discuss the city comments. The county accepted Santa Fe Spring's request but rejected Downey's. Figure 3 shows the final project area based on County's recommendations.

After the study area was defined, Siemens GTS staff conducted a field survey to collect lane-configuration and land-use information of the project arterial streets. This information is presented in the following tables. The geographic locations of all the intersections that have been surveyed are shown in Figure 4.

Figure 1: Preliminary Project Boundary Definition (Per County)

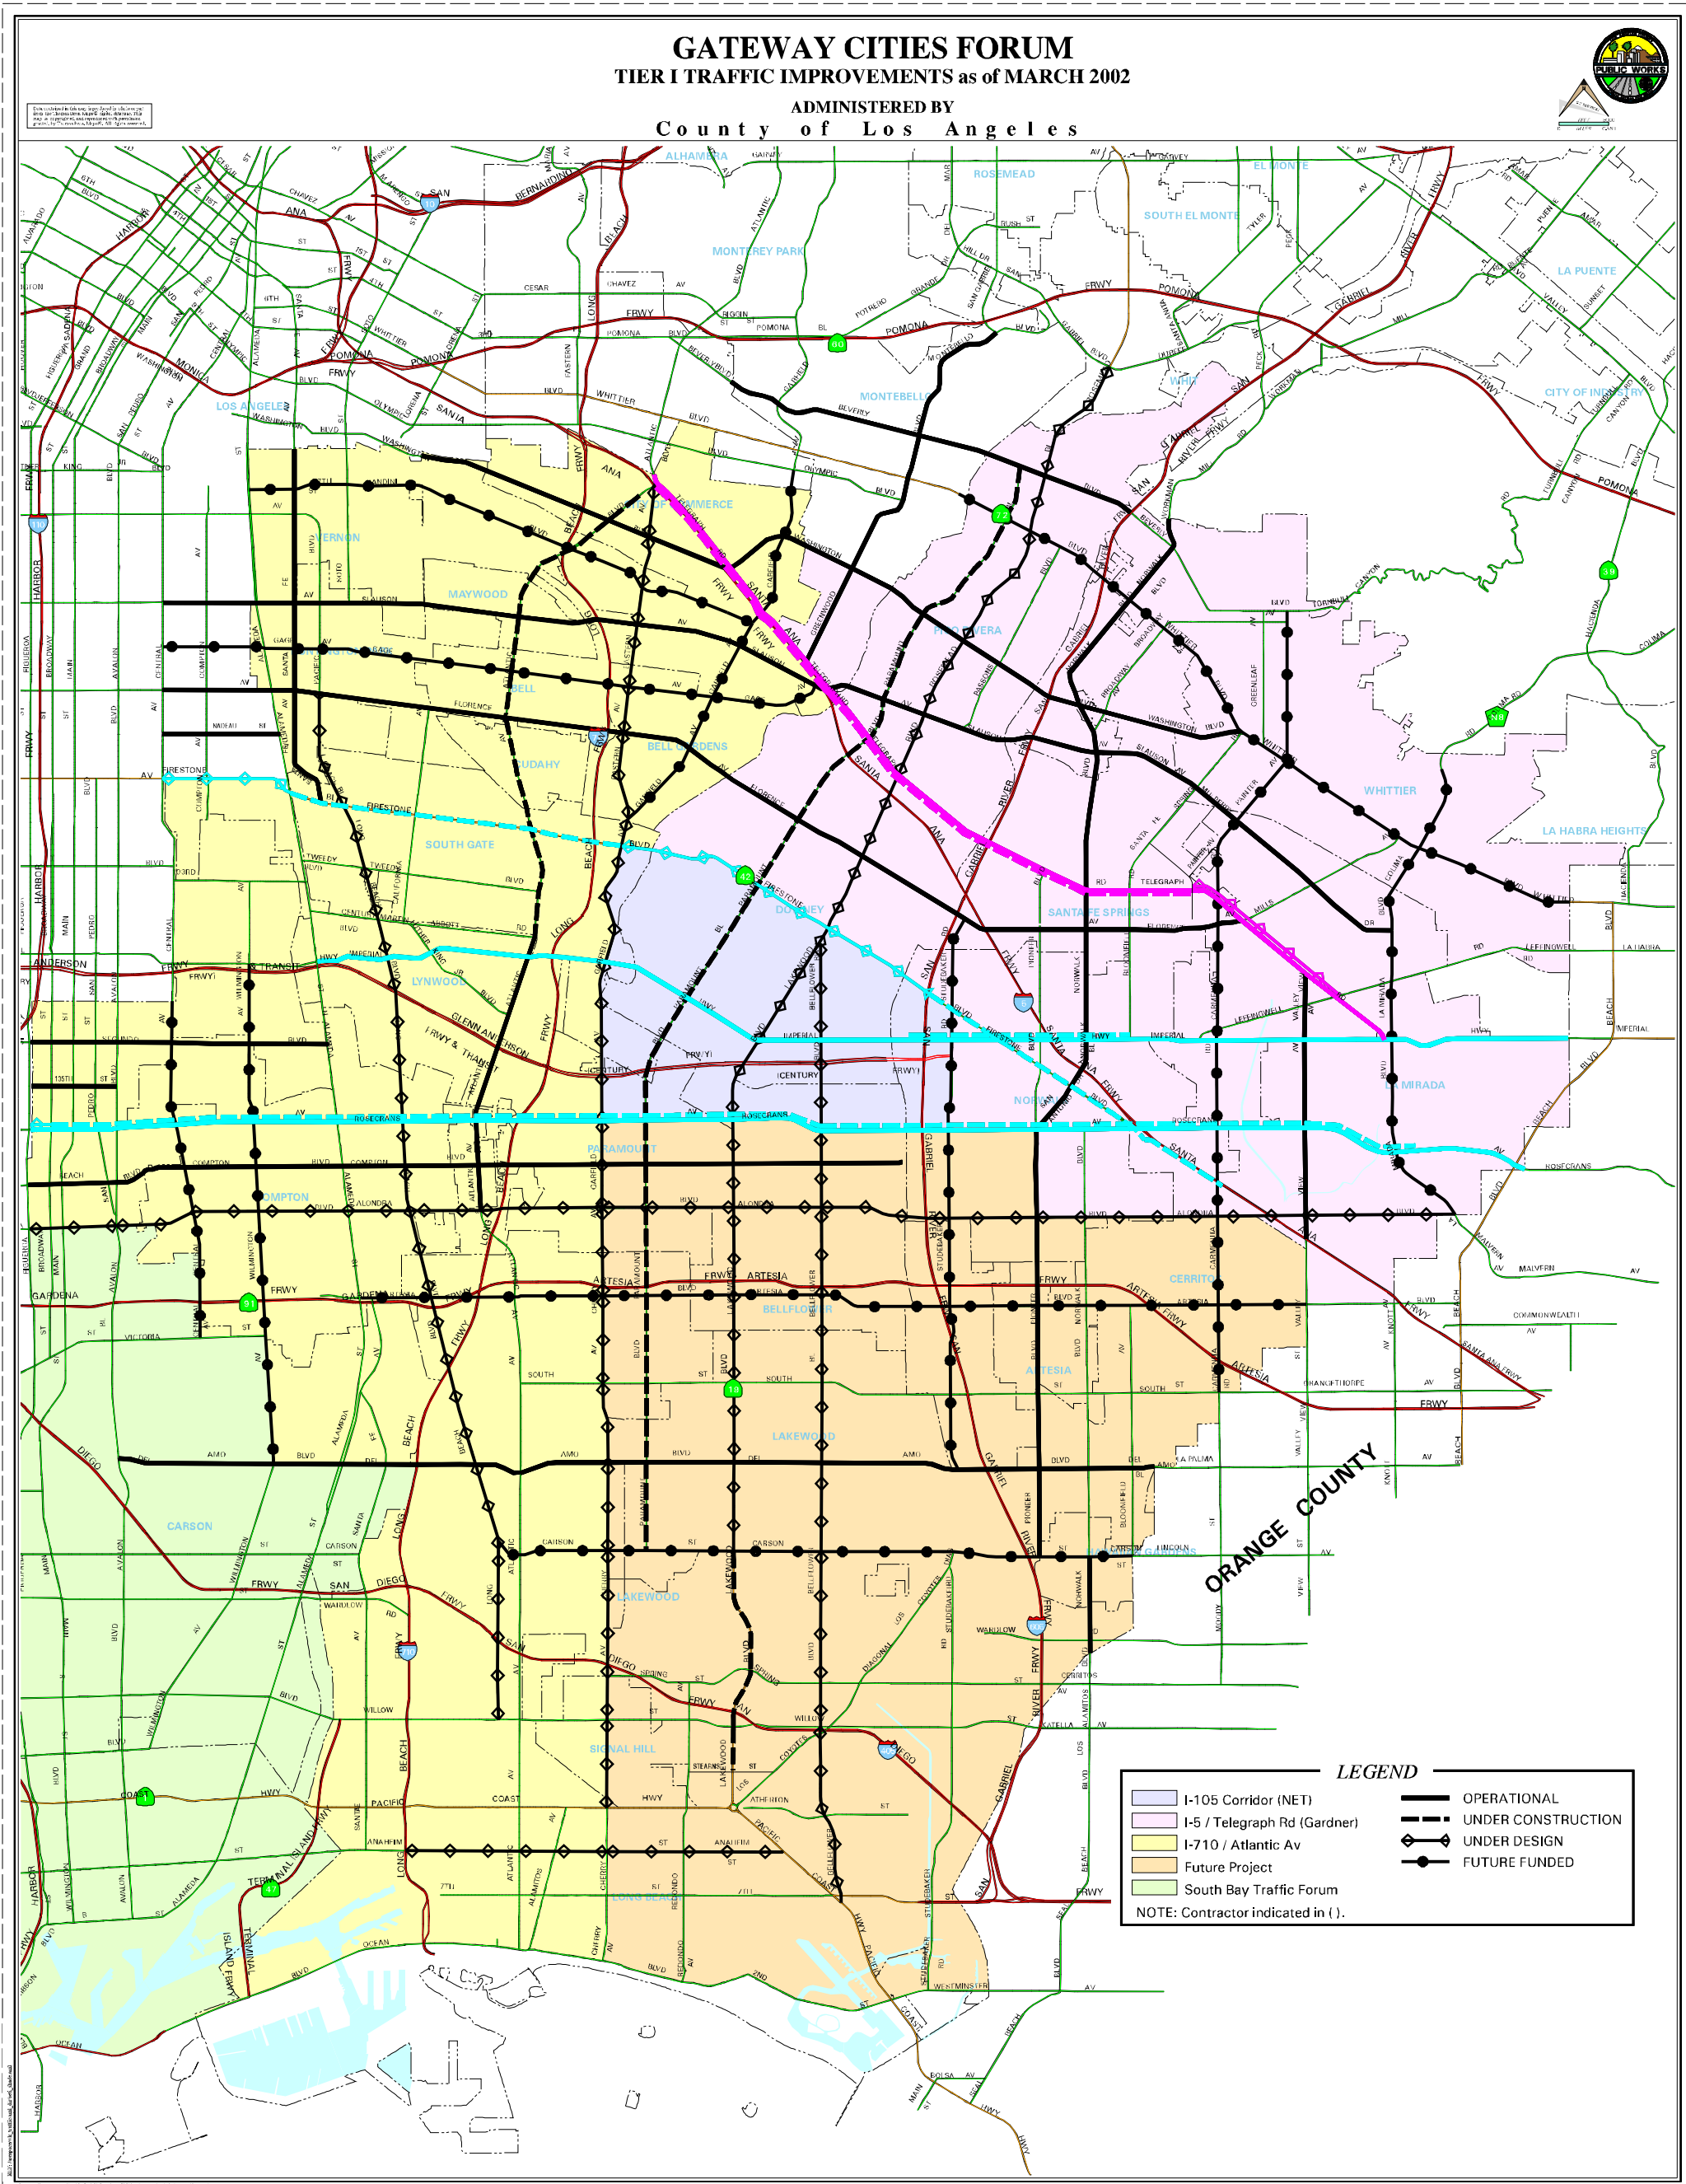

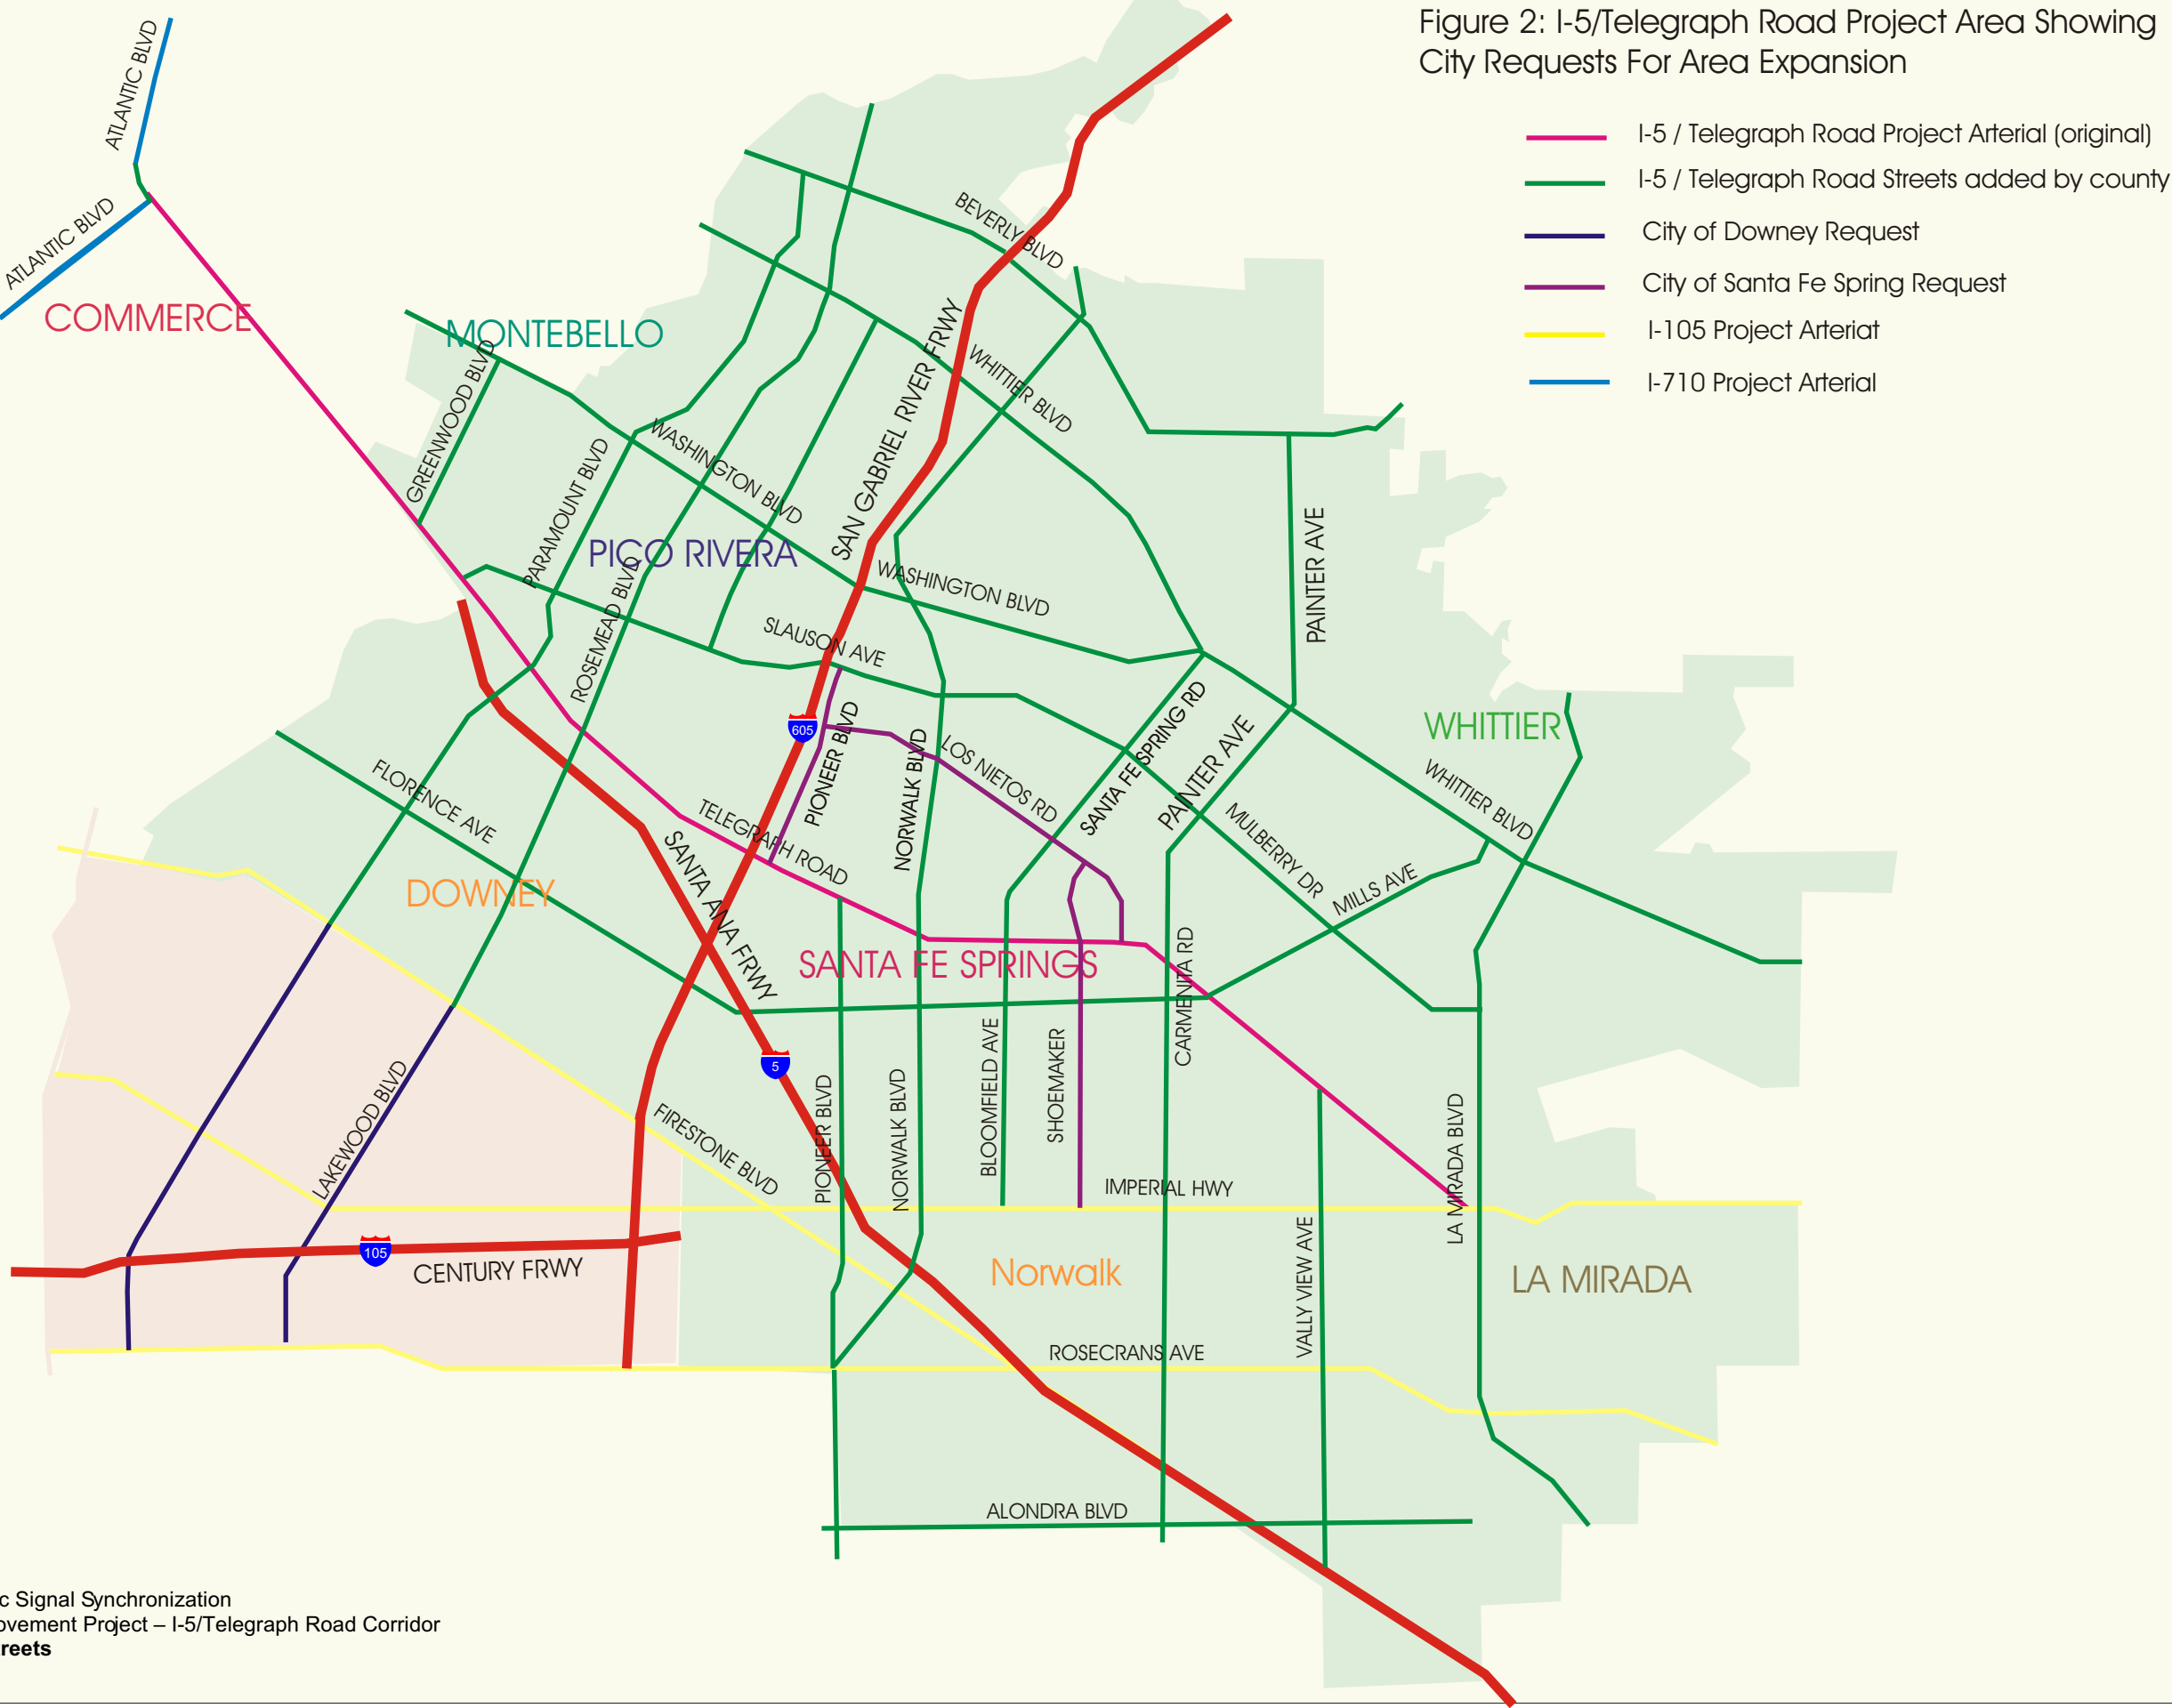

Figure 2: I-5/Telegraph Road Project Area Showing City Requests For Area Expansion

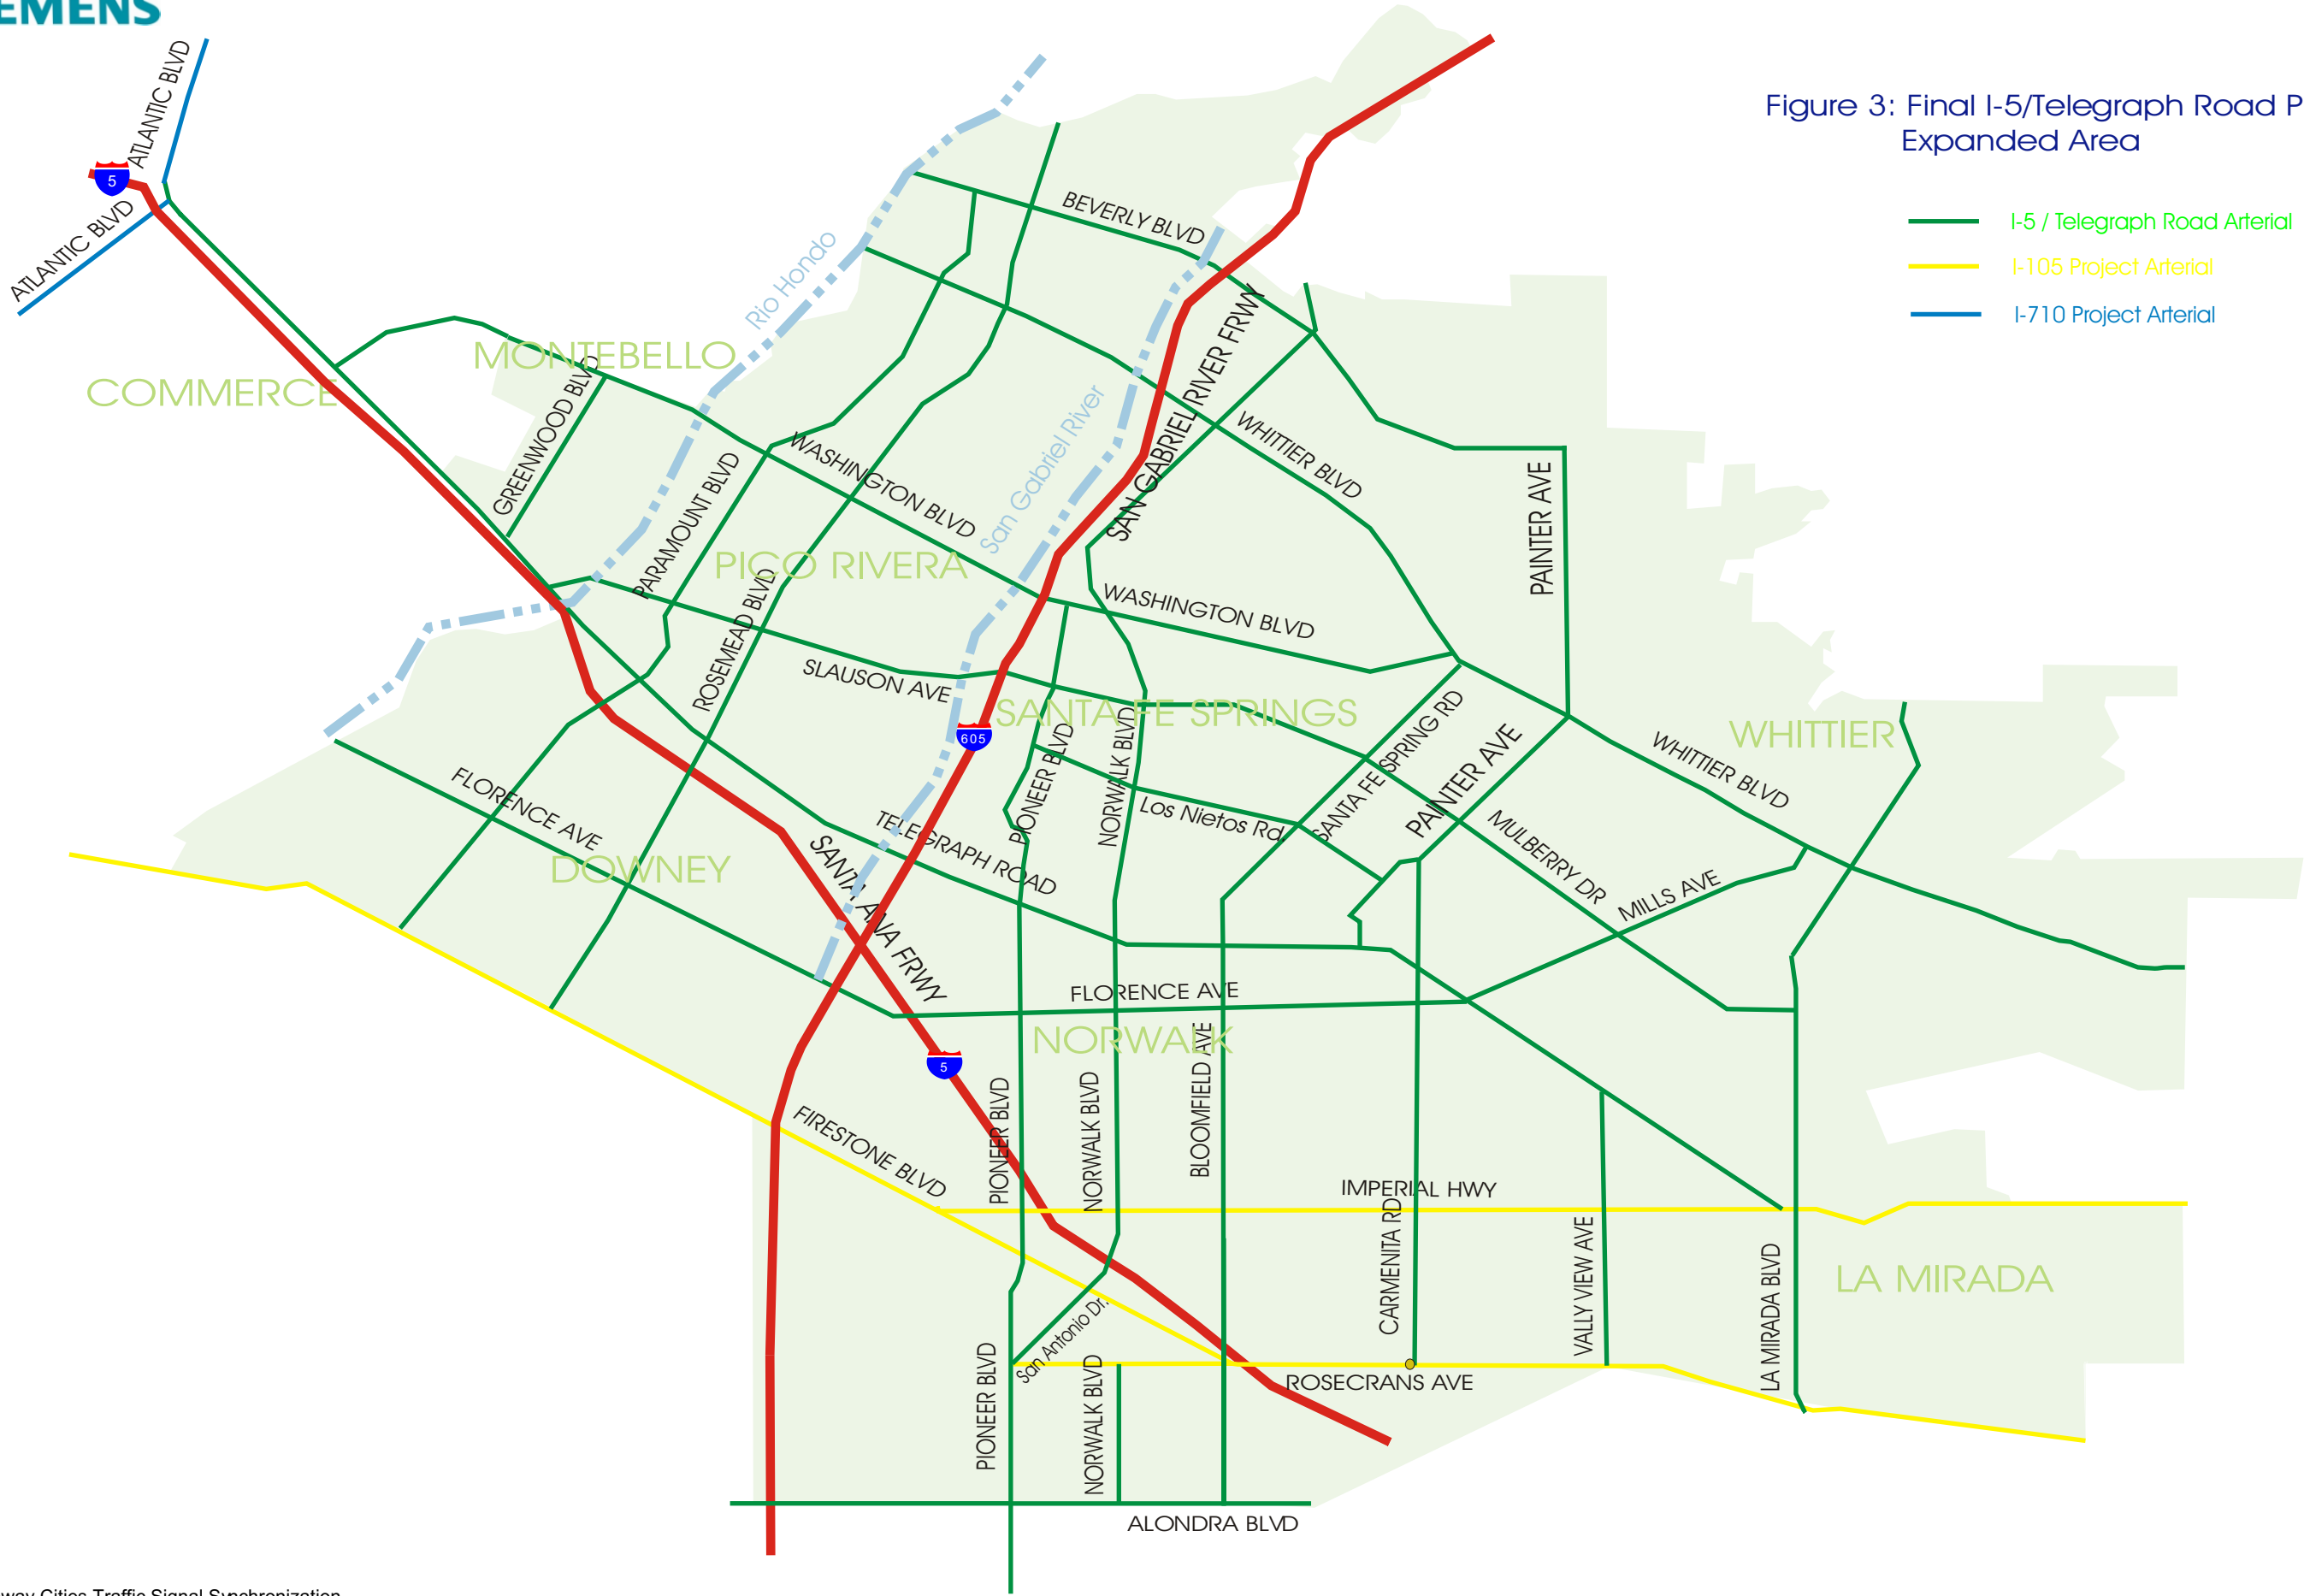

Figure 3: Final I-5/Telegraph Road Project Expanded Area

Figure 4: I-5 / Telegraph Road Expanded Project Area Showing Signalized Intersections
